Hog Cholera Under Control.
 Through the ceaseless vigilance and prompt action of fifty county farm bureaus, the state is practically free from hog cholera. From an annual loss running into the millions of dollars, the loss from cholera so far this year will reach but a few hundred thousand dollars. Credit is also given the federal bureau of animal industry, which furnished several specialists to fight cholera outbreaks, and the veterinarians of the state, who worked hand in hand with the farm bureaus and gave valuable assistance. The hog-raising sections of the state are now thoroughly organized and practically all of the farmers schooled to report the immediate appearance of cholera. A few years ago some farmers thought it good policy to remain silent when the disease appeared in their herds. Vaccination now follows promptly any outbreak, and the disease is thereby localized and quickly stamped out.

Flour Cheaper Than Wages.
 Flour is cheap compared with wages, according to the Nebraska College of Agriculture. With skilled labor at \$1 an hour and unskilled at 50 cents an hour, 60 hours of skilled or 120 hours of unskilled labor will purchase enough wheat to suffice the average family a year. An hour's labor now will purchase more wheat from the farmer than at almost any previous time in the history of the world. In spite of this the consumption of flour has tended to decrease. In pre-war years it was on an average of 235 pounds per person. For the year ending July 1, 1919, it was only 171 pounds. For some reason there has been a substitution of high-priced foods for flour. It is estimated that a return to the pre-war consumption of flour would save the country a billion dollars annually on its food bill.

FARM BARGAIN.
 For a period of 30 days I will offer for sale at a bargain price and on liberal terms, one of the best farms in Thurston county, Nebraska, located one and three-quarters miles south of Winnebago, and four miles south of Homer. This farm comprises 160 acres of practically level, highly productive land, improved with good 7-room house, barn, cribs, hoghouse, and other necessary outbuildings, and about two miles of woven wire fence. About 100 acres of this farm is now in tame grass. The farm is located on a perfect road to a good market, churches and excellent schools, both Protestant and Catholic. For price and terms address, SIDNEY T. FRUHA, Dakota City, Neb.

SHARKS OUT OF WATER.
 Government: Photo Two of Them in Penitentiary for Shady Stock Dealing.

New schemes for inducing the investing public to part with its savings, its Liberty Bonds and War Savings Stamps in exchange for stocks of speculative or doubtful value, constantly are being developed. One of the latest of these was disclosed re-

cently in the trial of Ellsworth J. Green and his son, E. H. Green, at Oklahoma City. This particular scheme was the means of leading the Greens in Leavenworth Prison for five-year terms, but not until many hundreds of investors lost their savings.

The Greens, through the Great Western Guarantee Investment Company of Oklahoma City, promoted five oil companies. The original sales price of the stock in these companies was \$1.00 a share, but by resale agreement purchasers were guaranteed that the Great Western Company as fiscal agent would resell the stock if desired at the end of six months to net the investor \$2.00 a share or a profit of 100 per cent.

As the date to fulfill this agreement drew near, stockholders were advised that the price of the stock had reached \$2.00 a share. Naturally if they came to believe the stock was worth \$2.00 they declined to accept the opportunity to sell for \$2.00.

For a time stock salesmen reaped rich commissions, but finally rumors that the reports were misleading began to spread. At a company banquet at Oklahoma City it was charged that the Greens attempted to sell out to the salesmen. At this point the government stepped in, arrested the promoters and began to unravel evidence which finally landed the Greens in prison on the charge of using the mails to defraud. Now the stockholders are attempting to save what is left of the assets of the companies.

Promises of profits of 100 to 500 percent made by stock promoters seldom become realities. The country is being flooded with wild cat stocks by unscrupulous investors. The resale plan of the Greens is only one of the many varieties of bait used. Any of these promoters are willing and anxious to take Liberty Bonds or War Savings Stamps and Treasury Savings Certificates in exchange for their bits of paper. They are perfectly willing to give promise of profits for the sure payment guaranteed by the federal government.

Investments in government saving securities and Liberty Bonds are safe, sure and profitable. The investor not only is guaranteed against loss, but he is assured that money so invested will go toward solving the economic problems with which all are faced and in making the country greater and more prosperous instead of seeing his savings go to provide luxuries and an easy living for dishonest promoters.
